

**Acuven Technology**

WhatsApp AI Customer Service + ERP / CRM

# Your business, answering on WhatsApp around the clock.

An AI customer service agent that checks stock, takes orders, books rooms and property viewings, and writes every one of them into your ERP and CRM. Your customers don't download anything, and you stop living on your phone.

Retail

Food delivery

Hotel & travel

Real estate

SaaS support

**Scan and try it on WhatsApp now**

Send **menu**, pick an industry, and chat with it the way your customers would.

**+60 17-394 8123**

## WHY IT MATTERS

# Your customers are all on WhatsApp. You only have two hands.

### The same questions, dozens of times a day

"In stock?" "How much?" "What time do you open?" Easy to answer, but they eat your whole day.

### After hours, nobody replies

A customer ready to buy at 11pm won't wait until morning. They'll message the next shop.

### Orders copied by hand from chats

Wrong quantity, missing address, invoice forgotten. Every order depends on someone remembering.

### Customer details scattered across phones

Who bought what and who asked about what: it leaves when your staff do.

## WHAT WE BUILD

# One AI agent on your WhatsApp number, connected to your systems

### Your customer

on their usual  
WhatsApp:  
text, photos, voice  
notes

### AI agent

understands, looks  
things up,  
gets things done

### ERP · CRM

stock, orders,  
invoices,  
bookings,  
customer records

### You and your team

see every order,  
step into any chat

## Answers from your real data

Prices, stock and room availability are looked up live. When a system can't be reached, it says so instead of guessing.

## It does the work, not just the talking

Conversations end with real order numbers, invoices, bookings and tickets.

## You stay in control

Your staff can take over any conversation at any moment, then hand it back.

# Everything a good front desk does

Whatever your business, these come as standard.

## 24/7, right on WhatsApp

On the app your customers already use every day. Nothing to download, nothing to sign up for.

## Replies in the customer's language

Mixing languages in one message is fine too.

English

中文

Bahasa Melayu

## Understands photos

A customer snaps a product, a price tag or a broken item, and it knows what it's looking at.

## Understands voice notes

Customers who'd rather talk than type just send a voice note.

## Reads documents

Send it a PDF and it answers questions about it, telling you which page the answer came from.

## Remembers returning customers

What they bought, what they asked, where to deliver. Customers don't have to repeat themselves.

## Hands over to a person

For special requests, or when the customer asks for a person, the AI steps aside and your staff take over.

## Tap instead of type

WhatsApp buttons and pick-lists for products and options, so customers type less.

## Every order in your back office

Orders, bookings, viewings and tickets land in your back office automatically.

## Keeps customers posted

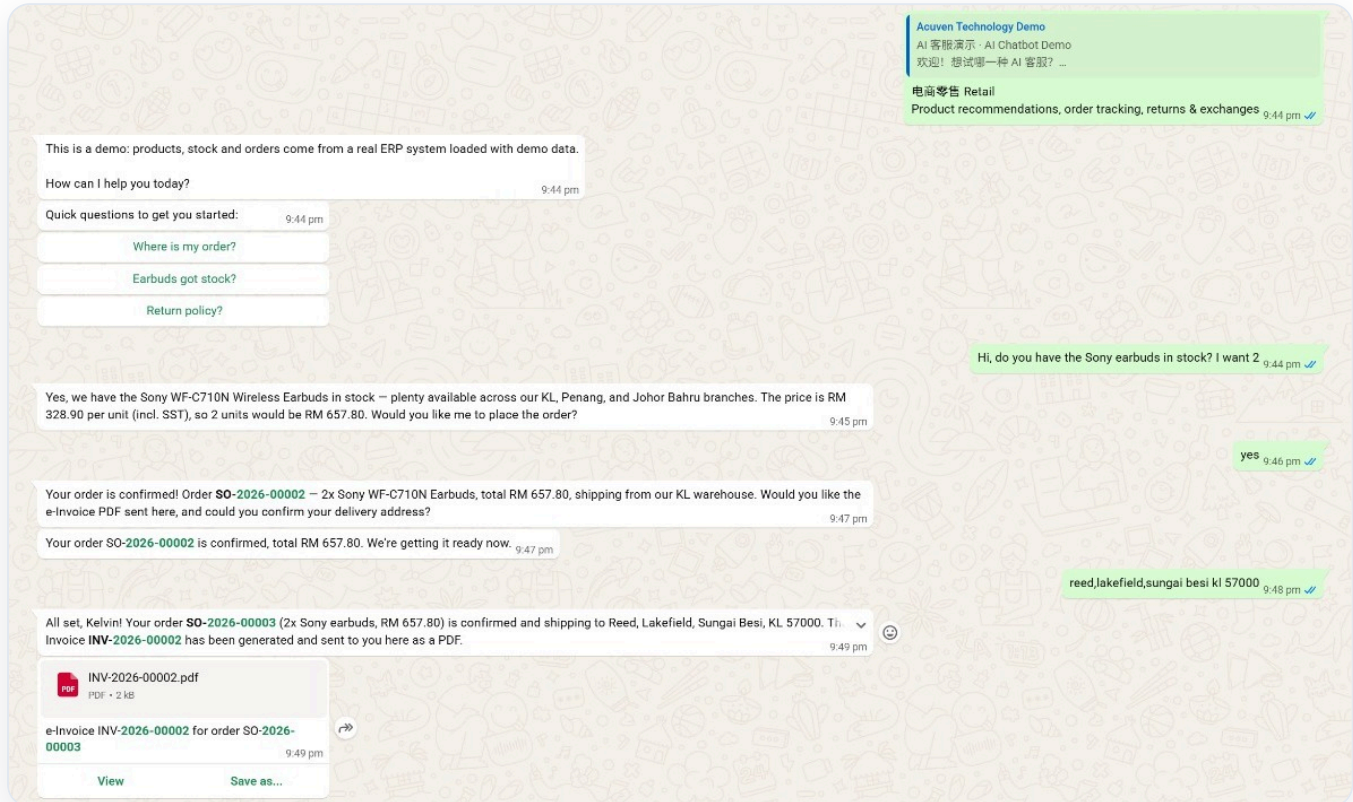

Order confirmed, food ready: the customer hears about it before they have to ask.

## RETAIL

# Stock, orders and invoices, all inside the chat

## WHAT YOUR CUSTOMER SEES · WhatsApp

- Checks live stock across your branches  
"Still have this one?" gets the count at each outlet.
- Places real orders straight into your ERP  
Once the customer confirms, a real sales order is created. No retyping.
- Issues the invoice and sends the PDF in the chat  
The customer has a proper invoice in hand on the spot.
- Handles returns from a photo  
It recognises the item, finds the order and raises the refund note.
- Every buyer lands in your CRM  
Next time they message, it remembers what they asked and bought.
- Sends the order confirmation by itself  
The customer hears from you before they wonder.

## BACK OFFICE · The WhatsApp order, already in your ERP's sales orders

# Orders, totals and updates, nothing missed

## WHAT YOUR CUSTOMER SEES · WhatsApp

- Knows local dish names  
Nasi lemak, teh tarik, 椰浆饭, 拉茶: however the customer says it.
- Adds up the bill for you  
Delivery fee included, and nothing is placed until the customer confirms.
- Remembers the delivery address  
Regulars don't have to type it again next time.
- Tells customers when the food is ready  
"Ready, rider about 10 minutes away." No chasing.
- Passes special requests to your staff  
"Leave it at the door", "extra sambal": a person handles it.

We have three options in Penang for 2 guests:

1. **Superior City Room** – RM 260/night (city view, queen bed, free WiFi)
2. **Heritage Suite** – RM 420/night (Georgetown heritage decor, breakfast included)
3. **Penthouse** – RM 890/night (rooftop terrace, panoramic view)

Which appeals to you, and what dates are you thinking? 9:57 pm

This weekend is Saturday 19 September to Sunday 20 September – that's one night, not two. Did you mean:

- This Saturday and Sunday (19–20 September, one night), or
- A longer stay over the weekend?

9:57 pm

Perfect – this Saturday 19 September to Sunday 20 September, one night for 2 guests in Penang. Which room would you like?

1. **Superior City Room** – RM 260 total
2. **Heritage Suite** – RM 420 total
3. **Penthouse** – RM 890 total

9:58 pm

Great – the **Heritage Suite** at RM 420 for one night. Shall I book it for you? 9:58 pm

Booked! Your confirmation number is **BK-00020** – Heritage Suite in Penang, Saturday 19 to Sunday 20 September, 1 night for 2 guests, RM 420 total. Breakfast is included. Check-in is from 3:00 PM, check-out by 12:00 PM. 9:58 pm

I'd like a room in Penang for two 9:57 pm ✓

This weekend, two nights 9:57 pm ✓

only this weekend 9:57 pm ✓

second room 9:58 pm ✓

yes 9:58 pm ✓

- Searches rooms across your properties  
By dates and guests, with every room type and its price.
- Understands "this weekend"  
"Next Friday" or "esok" becomes exact dates, confirmed with the guest.
- Books, and changes dates, rooms or guests  
The price is recalculated every time, in plain sight.
- Stops accidental double bookings  
A guest who confirms twice still gets one room.
- Passes special arrangements to your front desk  
Airport pick-ups, extra beds: your staff take it from there.

# Turn every enquiry into a booked viewing

## WHAT YOUR CUSTOMER SEES · WhatsApp

This is demo data for a fictional property agency, not a real listing platform.

How can I help you today? 10:19 pm

Quick questions to get you started: 10:19 pm

- What listings do yo...
- Any 3-bedroom under...
- Estimate my mortgage

I've searched our listings, but I don't have any 3-bedroom properties in Puchong under RM 600k at the moment.

What I do have available:

- **PROP-206** (Cheras) — 3-bed condo, 900 sqft, **RM 450,000** ✓ Under your budget
- **PROP-201** (Mont Kiara) — 3-bed condo, 1,100 sqft, RM 850,000

The Cheras property matches your budget. Would either of these interest you, or would you like to wait for something in Puchong? 10:19 pm

Great. To book a viewing of the Cheras property (PROP-206, 3-bed condo, RM 450k), I'll need your name, and which date works for you. When would you like to visit? 10:19 pm

Next Saturday is 26 September at 3pm — got it. Just need your name to confirm the viewing. 10:20 pm

All set. You're all booked in! 10:20 pm

# Fix it first, open a ticket only when needed

## WHAT YOUR CUSTOMER SEES · WhatsApp

- Walks customers through known fixes  
Can't log in, no emails arriving: step by step, before anything else.
- Opens a ticket when it can't fix it  
With a priority set, ready for your support team.
- No duplicate tickets  
A customer who asks twice still gets the same ticket.
- Answers plan and pricing questions  
"Which plan suits me?" answered on the spot.
- Checks ticket status any time  
"What's happening with my ticket?" gets a straight answer.

### Ticket board

## BACK OFFICE · Every ticket with its issue, priority and status

## ABOUT US

# Acuven Technology builds the systems behind your business

We are a Malaysia-based team building enterprise-grade ERP, CRM and AI-powered systems that eliminate manual work and help your business scale. We don't just write code: we build systems that solve real business problems and deliver measurable results. Every project is custom-built from scratch, no templates.

**30+**

Projects delivered

**15+**

Years of experience

**20+**

Happy clients

**100%**

On-time delivery

## WHAT WE BUILD

### CRM systems

Customer records, leads and follow-ups in one place

### ERP & inventory

Stock, orders and suppliers in one system

### AI automation

AI customer service, automated reports, data extraction

### POS & billing

Checkout, invoices and e-payments together

### Custom dashboards

Your operations and KPIs at a glance

### Business websites

Fast, professional sites that bring in leads

## INDUSTRIES WE SERVE

Retail & e-commerce

Logistics & supply chain

Manufacturing

Healthcare & clinics

Education

Automotive

Property & real estate

F&B & restaurants

### We listen before we build

A free consultation to understand your business, pain points and goals before any development starts.

### No surprises

Milestones and regular progress updates, with no hidden costs.

### We stay after launch

Ongoing maintenance, fixes and updates keep your system running.

## GETTING STARTED

# From first try to live, in four steps

1

### Try the demo

Scan the code and chat with it like a customer would.

2

### Tell us about your business

What you sell, how orders flow, what systems you use today.

3

### We build and connect

Your WhatsApp number, your products, your systems.

4

### Go live

Customers message you as usual, and the AI starts taking orders.

## PRICING

# WhatsApp AI customer service + ERP / CRM, one package

One-time development from

**RM 3,999**

Built around your business: the AI agent, ERP, CRM and back office.

Annual renewal from

**RM 699** / year

Keeps everything running, year after year.

AI usage

### Pay as you use

You pay for the conversations you actually have. No chats, no charge.

## Let's talk about your business

Your quote depends on what you need.
